#5 Version

It didn't show red in mine for some reason but I've removed all of it except the bit about ITAC remains the same (its FOUO so should be no issue using that bit here). During the JIG meet yesterday the ITAC rep said the one they shared was ok for official use only but they have one rated TS that is not being disseminated except in certain situations.

Let me know

The 29<sup>th</sup> is in the title as in the truck convoy event is scheduled to start 29 Jan, the 28<sup>th</sup> below at the right is the date of writing, next to the version number, which is # 4

The attached is the best one, all clean and indented properly from top to bottom.

Chris

Ok, I removed the Hirsch and sad protesters reference, removed the useage of the word "information" in ten instances to the word "intelligence" which brands the info as classified.

Tightened up a few things concerning appearance, and changed the dates/version number on the front cover

Once you all ok this I'll start the high level doc on the OPP info about the heavy equipment e3t\\tc

Will do and yes we contact rcmp csis and pats with a request for any adverse and at the time none. Largely to do with this event changing and growing significantly in the past few days.

I'll take out the ref to Hirsch and sad protesters

Hi Chris,

Thanks for this.

For confirmation is this statement accurate:

“The Ottawa Police – Security Intelligence Section have completed indices checks with municipal, provincial, and federal partner agencies. No adverse intelligence or any information concerning a specific threat towards this event has been determined at this time”

Further, please take out the Sam Hersch comment and possibly re-phrase the following “professional protest” with the usual **sad** players”

Thanks,

---
